CNSI PhD Careers Workshop

Part 1: Faculty Positions

Rob Candler Ph.D.
Assistant Professor - Electrical Engineering, UCLA

“Pathways for Getting a Faculty Position”

How do you establish your career now that you have a freshly minted PhD (or soon will)?

Speakers who know the application process will answer questions and give valuable advice!

Through this workshop series, we hope to help you successfully apply for a job after earning your Ph.D. Experienced speakers from both sides of the process (searching and hiring) will offer their advice and answer any questions that you may have.

To kick off this workshop series, Professor Rob Candler will share his recent experience acquiring a faculty position at UCLA.

Rob N. Candler received a B.S. in Electrical Engineering from Auburn University in 2000. He earned his M.S. in Electrical Engineering from Stanford in 2002 and his Ph.D. in 2006. He was a research engineer from 2006-2007 and then a senior research engineer from 2007-2008 at the Bosch Research and Technology Center in Palo Alto, CA. During this time, he was also a Consulting Assistant Professor at Stanford University, where he taught a graduate level course on Sensors. He joined the faculty at UCLA in 2008, where he is currently an Assistant Professor and directs the UCLA Sensors and Technology Laboratory.

Brownies/Cookies/Coffee will be served
